

# ABSTRACT OF THE DISCLOSURE

An electroluminescence device, including phosphor particles, which phosphor particles give donor-acceptor  
5 type luminescence, and have an average equivalent sphere diameter of 1.0  $\mu\text{m}$  or more and 12.0  $\mu\text{m}$  or less and a coefficient of variation of equivalent sphere diameters of 3% or more and 30% or less.
